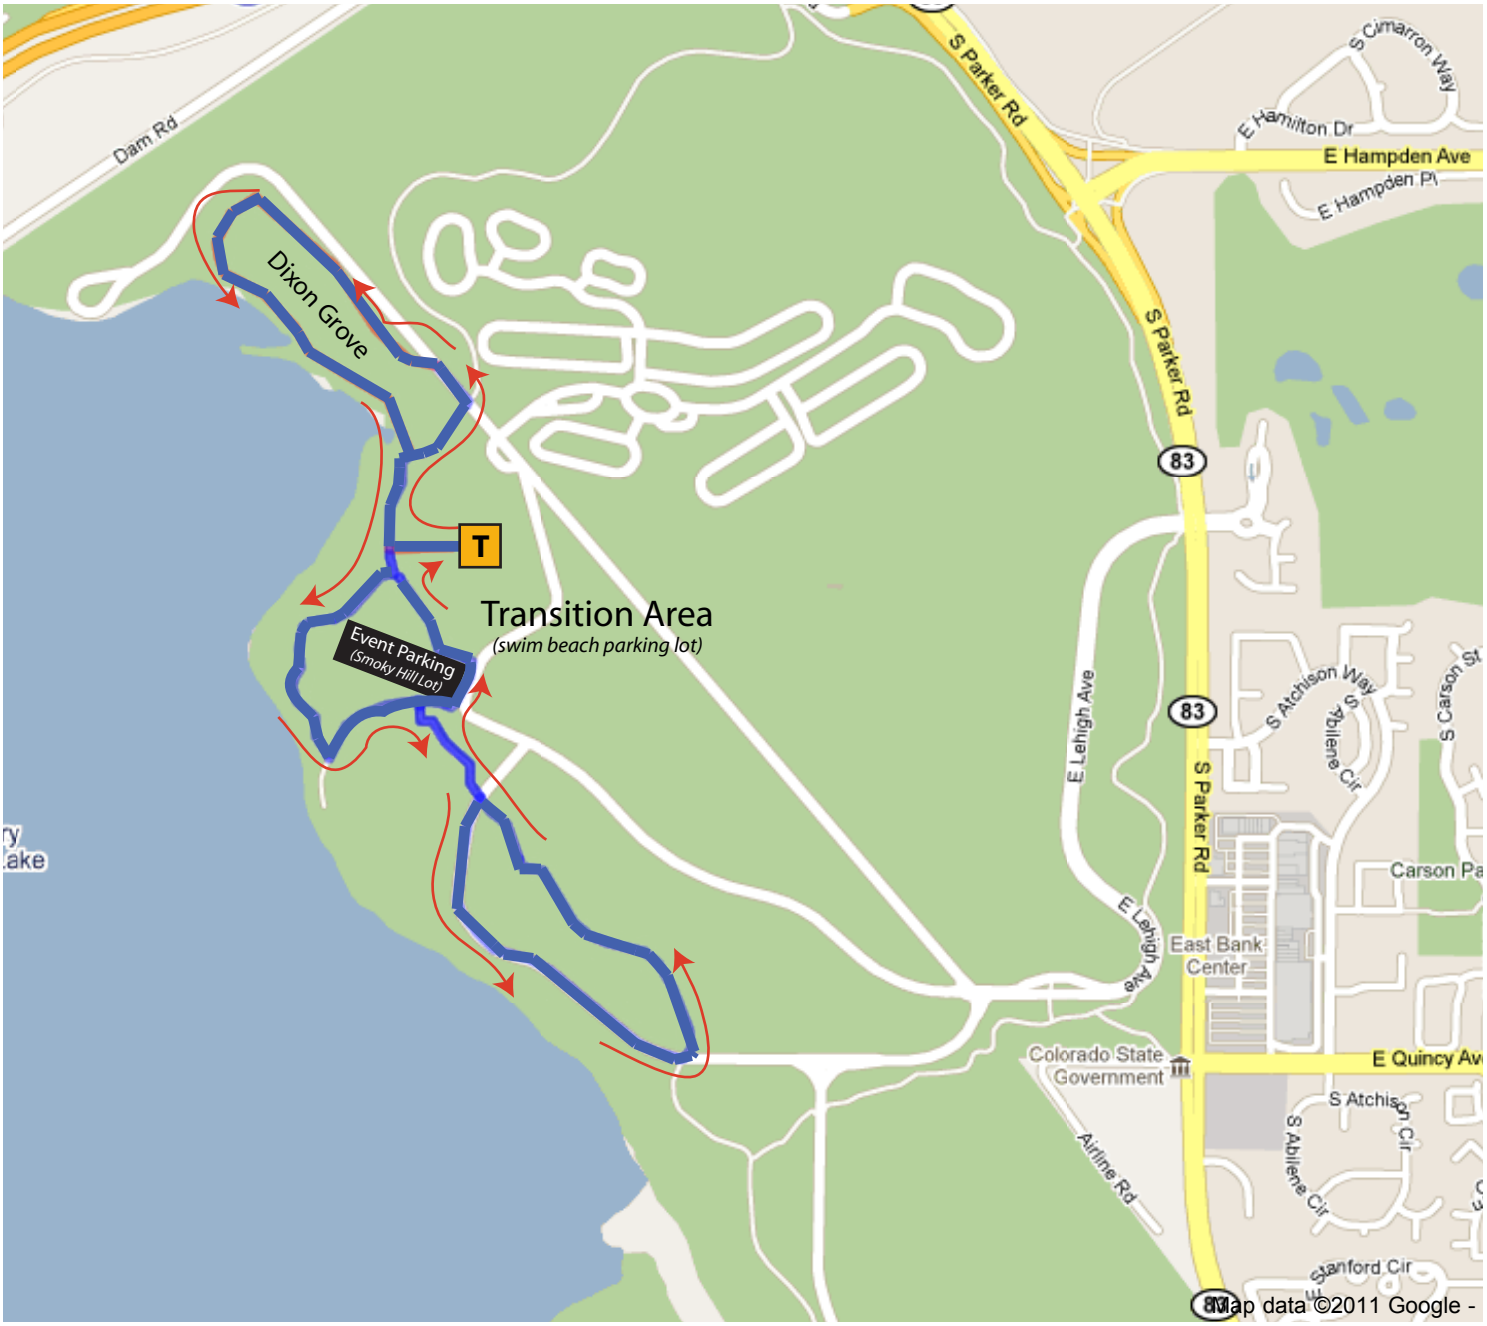
Barkin' Dog Duathlon
Run-2 Course Map



The second run is a 5K for both long and short course participants. It is virtually identical to the opening 5K run, except for the first half-mile. Run-2 exits the transition area where the first run finished. It follows a paved bike path for the first half-mile, then follows a mix of paved bike paths and roadways. The course is a single loop (no out & back's) that is 3.05 miles in length (just shy of an official 5K). The run finishes under the finish arch in the expo area, immediately adjacent to transition

Start, Finish, and Transition located in the Swim Beach Parking Lot. Event Parking will be located in the Smoky Hill lot, immediately south of the transition area. Participant parking will be in this lot, only. We encourage carpooling for this event.
